## Revolutionising Network Security with AI-Powered Insights

Adaptive Cybersecurity / Next-Gen Expertise / Proactive Consulting

### Seeking simpler, stronger network security?

Elevate your security posture with AI-driven misconfiguration alerts and automated fixes. Predict firewall overloads before they hit, and unify security event visibility.

All from a single cloud-based platform by Palo Alto Networks.

### Key Benefits of AIOPs for NGFW

**AI-Powered Security:** Elevate defenses with real-time, machine-learned recommendations and predictive foresight on disruptions.

**Smart Policy Tuning:** Auto-correct policy inefficiencies before they're even committed—strengthening security while saving you time.

**Effortless ROI:** One-click deployment and ServiceNow integration amplify your firewall investment, freeing up your security team.

**360° Threat View:** A unified dashboard offering razor-sharp focus on the threats that really matter, across all network layers.

## Key Capabilities of AIOps for NGFW

- 1. Precision-Tuned Security:** Boost your defenses with custom insights spanning antivirus, URL filtering, and WildFire sandboxing.
- 2. Predictive Firewall Health:** Gain a seven-day head start on firewall issues using machine-learned insights for optimal NGFW performance.
- 3. Unified Security Dashboard:** Consolidate data from multiple security services into one view. Explore logs and generate PDF reports on zero-day and high-risk threats.
- 4. Smart Device Prioritisation:** AIOps intelligently highlights the devices and alerts requiring immediate attention, allowing you to optimise your focus for maximum impact on both health and security posture.
- 5. Alert-Centric Workflow:** Customisable alerts via email and ServiceNow streamline your remediation process. Utilise advanced filtering and grouping to zero in on critical issues, be it by alert category or software version.

## Modern Challenges in NetOps

### Poor Secure Posture

Suboptimal setup of costly security gear results in poor ROI.

### Preventable Business Disruption

Unable to preempt issues causing network disruptions.

### Underutilized Security

Businesses struggle to navigate threats to their apps, users, and devices.

## Why engage Murdoch Webster

**Expertise:** Our team of experienced cybersecurity experts can provide guidance on deploying AIOps for NGFW technology with industry best practices.

**Comprehensive Coverage:** With care and expertise, we design, deploy, and support all aspects of your NGFW deployment.

**Flexibility & Scalability:** We dial-in your AIOps for NGFW strategy to scale with your business, ensuring flexibility and adaptability.

**Competitive:** Tailored to your business demands, we deliver comprehensive, best-in-class solutions affordably.

## A rare bread in Palo Alto Networks Partner

A cybersecurity pioneer, we have partnered with Palo Alto Networks for over 12 years. Our depth in technical excellence, industry knowledge and strategic alignment drives successful outcomes for a truly diverse range of clients across all industry verticals.

A **Palo Alto Networks Platinum Innovator**, we have a deep understanding and comprehensive technical capabilities across their industry-defining cybersecurity platforms.

Our engineers are recognised as some of the foremost experts in the global Palo Alto Networks technical community.

As the only Australian grown **Palo Alto Networks Certified Professional Services Partner (CPSP)** we are one of the few partners across the Asia Pacific to attain this elite status.

As a CPSP partner you can be confident we adhere to the latest best practice deployment methodologies with the support of Palo Alto Networks expertise and resources.

**CYBERFORCE**

Palo Alto Network's **CyberForce represents the top 1% of partner engineers**, renowned for their exceptional security expertise and customer-centric approach.

Difficult to achieve and highly valued, membership in the CyberForce program reflects our elite levels of engineering excellence delivering real-world customer success.
